## **INVITATION FOR THE XXIX INTERNATIONAL SEMINAR OF ERGONOMICS**

---

It is the 29th time we are inviting specialists - practitioners as well as theorists in the fields of ergonomics, occupational safety engineering and quality engineering to exchange experience and present the results of the research. This year we have chosen Gniezno - the historical capital of Piast Poland. Besides attending this ambitious scientific programme we also offer tourist attractions.

This seminar includes topics of ergonomics, occupational safety engineering and quality engineering. Such an approach shows an interdisciplinary character of contemporary issues in science which require simultaneous actions in diverse directions. It creates a synergistic effect that will help to solve the undertaken issues, both theoretical and practical.

We believe that you will find the possibility of achieving your scientific goals and aspirations, and exchange experience with experts from different fields.

Hoping to meet all your expectations, we are cordially inviting you to Gniezno.
